

PUTTERMORE

League Admin User Guide & Operating Manual

MOBTOWN BREWING CO.

 **Executive Summary:** Welcome to **Puttermore**, the digital command center for the Mobtown Brewing Co. Wednesday Night Social Putting League (6:00 PM – 9:00 PM EST). This official operating manual provides step-by-step instructions for League Commissioners, Admins, and Desk Staff on managing rosters, running Wednesday match nights, recording scores on-the-fly, and rolling over future seasons.

1. Logging In & Admin Roles

To access admin controls, navigate to **puttermore.netlify.app** and click  **Login** in the top navigation bar.

PROFILE MODE	ACCOUNT NAME	USAGE & PURPOSE
 Official Commissioner	J-M0 Boh / Shane OldBay	Official League Operations. All updates (teams, scores, standings) are saved live to the database for official league standings.
 Pre-Season Sandbox	Demo Tester (Sandbox Admin)	Safe Training & Testing. All changes remain strictly in your active browser session memory. Use this mode to practice scoring without affecting official league data.

2. Pre-Season Setup (Teams & Rosters)

In Mobtown Fall 2026, games are played in an **ad-hoc format**—meaning you do **not** need to build a rigid pre-scheduled matrix before the season starts. Your main pre-season job is registering teams and player rosters.

✨ Creating Teams

1. Navigate to **Admin Console** → 👤 **Rosters**.
2. Under **Create New Team**, enter the **Team Name** (e.g. *Dundalk Putters*, *Mobtown Misfits*).
3. Pick a custom team accent color and click **Create Team**.

👤 Registering Players & Assigning Captains

1. Under **Team Rosters**, select the team from the team list.
2. Click **+ Add Player**, enter the player's full name, pick an avatar accent color, and tap **Save Player**.
3. **Assign Captain:** Click the 🗨 **Captain** badge next to a player's name to designate them as Team Captain.
4. **Remove Player:** Click the ❌ **Remove** icon if a player drops out of the roster.

⚡ 3. Wednesday Match Night Operations

On Wednesday match nights (6:00 PM – 9:00 PM at Mobtown), teams walk up to the 6-cup turf board and challenge each other on-the-fly.

⚡ Recording a Match Score (3-Step Quick Console)

When two teams finish playing a Best-of-3 series:

1. Open **Admin Console** → ⚡ **Score Console**.
2. **Step 1 (Pick 2 Teams):** Select **Home Team (Team 1)** and **Away Team (Team 2)**.
3. **Step 2 (Enter Scores):** Enter cups sunk for Game 1, Game 2, and optional Game 3 (leave Game 3 blank if a team won 2-0).
4. **Step 3 (Publish):** Click 🏆 **Complete & Update Standings**.

Standings Points Calculation Rules:

- **2 Points** **Series Winner (2-0 or 2-1):** Earns 2 points in league standings.
- **1 Point** **Game 3 Loser (1-2):** Earns 1 point (Game-3 / Overtime bonus point).
- **0 Points** **Sweep Loser (0-2):** Earns 0 points.

Recalling or Editing a Match Score

If an incorrect score was submitted by mistake, open **Admin Console** →  **Matches** tab. Click  **Edit Score** to modify game numbers, or  **Delete / Recall** to remove the match and recalculate standings automatically.

4. Season Rollover & Future Seasons

Puttermore natively supports ongoing future seasons (e.g., *Fall 2026*, *Winter 2026*, *Spring 2027*).

Launching a New Season

1. Open **Admin Console** →  **Settings** → **Season Rollover Console**.
2. Under **Launch New Season**, enter Season Name (e.g. *Winter 2026 Mobtown Season*), Duration (e.g. *6 Weeks*), and Start Date.
3. Click  **Launch New Season**. The app switches to the new active season with 0 matches recorded while preserving team rosters.

5. Frequently Asked Questions (FAQ)

Q: What if a team forfeits on match night?

A: Go to **Admin Console** →  **Score Console**, select the two teams, enter **6-0, 6-0** for the team that attended, and click Publish.

Q: How does the countdown banner on the home page work?

A: The countdown clock automatically ticks down to Wednesday, September 2nd, 2026 at 6:00 PM EST. When opening time arrives, it automatically transitions from  **COUNTDOWN TO OPENING NIGHT** to  **SEASON IN PROGRESS**.

Q: How can new admins practice without messing up live data?

A: Always log in under  **Demo Tester (Sandbox Admin)** mode. Sandbox mode suppresses database write calls and keeps your test scores strictly in your local browser session memory.
